

**AGRI TRAINING  
SOLUTIONS**

# RIIMPO321F Conduct Civil Construction Wheeled Front End Loader Operations

This unit is nationally recognised.

Upon successful completion, learners will receive a nationally recognised Statement of Attainment issued by:

Agri Training Solutions – RTO XXXXX

## ABOUT THIS COURSE

RIIMPO321F Conduct Civil Construction Wheeled Front End Loader Operations describes the skills and knowledge required to operate this machine safely and efficiently to carry out civil construction and maintenance tasks in accordance with workplace procedures and work health and safety requirements. The unit applies to individuals working in civil construction, infrastructure, resource, and agricultural environments who are required to load, move, and place materials using a wheeled front end loader.

On successful completion of this course, you will be awarded the following unit of competency:

[RIIMPO321F – Conduct civil construction wheeled front end loader operations](#)

*Completion of this unit does not automatically grant a licence or authorisation to operate equipment where additional regulatory or workplace requirements apply.*

# WHY CHOOSE US?

## WE'LL COME TO YOU

We know it's hard for people in rural and remote areas to access training services, that's why we have trainers on the road that will bring the courses to you!

## INDUSTRY SPECIFIC TRAINING

All our trainers have extensive knowledge of the agricultural industry and rural living, so our courses are relatable and industry focused.

## HAVE FUN!

Our courses are designed to be fun, interesting, and interactive but delivered in a way where scenarios are relatable to rural and remote environment and relevant to the agricultural industry.

## ACCESSIBLE LEARNER MANAGEMENT SYSTEM

We use a Learner Management System (LMS) which makes it easy to complete knowledge assessment requirements, access certificates quickly and keeps your portfolio for future training.

# COURSE CONTENT

This course provides learners with the skills and knowledge required to safely and efficiently operate a wheeled front end loader in civil construction, agricultural and related work environments in accordance with workplace procedures and work health and safety requirements. Course content includes:

- Planning and preparing for wheeled front end loader operations, including interpreting work instructions, site documentation and traffic management plans
- Conducting pre-start, safety and operational checks on the machine and associated equipment
- Identifying hazards, implementing risk controls, and applying safe work practices throughout operations
- Operating to load, carry, place and stockpile materials in accordance with task requirements and site conditions

- Maintaining machine stability, load security and safe operating limits under varying terrain and operating conditions
- Communicating effectively with other workers using appropriate verbal, hand and audible signals
- Monitoring performance, identifying common faults and reporting maintenance issues
- Performing shutdown, parking, cleaning and post-operational procedures
- Completing required workplace documentation and reporting in accordance with site requirements

## COURSE COMPONENTS

### FACE TO FACE KNOWLEDGE & PRACTICAL LEARNING / ASSESSMENT (12 HOURS / 2 DAYS)

The **knowledge component** involves theory training from your trainer and assessor to guide you through the learning and assessment process. This is done in a classroom setting and also whilst outside with the machine.

The **practical component** involves hands-on training where participants will learn and practice the applied skills with a trainer there to observe and provide feedback.

## COURSE REQUIREMENTS

To successfully complete this unit, students must participate in all required training and assessment activities and demonstrate competence in accordance with the unit of competency and the Standards for RTOs 2025. Students are required to engage in practical, hands-on training and assessment activities involving the safe operation of a wheeled front end loader in workplace or simulated environments that reflect real civil construction, agricultural and rural operating conditions.

Students must be physically capable of safely operating a wheeled front end loader, including performing pre-operational checks, manoeuvring the machine, managing loads and completing shutdown procedures. Students must be able to follow workplace instructions, apply work health and safety requirements, and communicate effectively with others on site.

There are no formal prerequisite units for this course. Students must comply with Agri Training Solutions' enrolment, attendance and assessment requirements, and adhere to all safety, site and equipment use procedures relevant to wheeled front end loader operations.

All course requirements are communicated to students prior to enrolment through the pre-training review process to ensure students understand expectations and are suitably prepared to undertake training and assessment.

If students have any queries or concerns regarding these requirements, they are encouraged to contact Agri Training Solutions to discuss available support options.

## ASSESSMENTS

There are two types of assessments you will be required to complete for this course:

1. Supported online learning for theory learning & assessment
2. Face-to-face practical training & assessment

If you are not satisfied with your assessment results, it is best to discuss it with your trainer and assessor first to see if you can arrange a reassessment. If you still find you are dissatisfied, you can complete a Complaints and Appeals form which can be found on our website and we will follow the process outlined in our Complaints and Appeals Policy which is in our Student Guide and on our website.

## CERTIFICATES

Upon successful completion of all required components, we will issue a Nationally Recognised Statement of Attainment (certificate) for the following:

[RIIMPO321F – Conduct civil construction wheeled front end loader operations](#)

Your certificate will be emailed as a PDF to your nominated email address **within 5 business days** of course completion, providing all competencies are met.

## REFUND POLICY

Some learners may be eligible for a refund in certain circumstances, please visit our Refund Request Policy for further information.

# STUDENT SUPPORT

Agri Training Solutions provides targeted and ongoing student support to ensure all learners are able to engage effectively in training and assessment and have equitable opportunities to achieve competency. Learner support needs are identified through the pre-training review process and monitored throughout the training and assessment period.

Support strategies are tailored to individual learner circumstances and may include assistance with language, literacy, numeracy and digital capability; flexible delivery and assessment arrangements; additional trainer support during practical activities; and access to learning resources in formats suitable for rural and remote delivery contexts. Learners are provided with direct access to trainers and assessors for clarification, guidance and feedback via face-to-face contact, phone or email.

Where additional support needs are identified that fall outside the RTO's scope, Agri Training Solutions provides referrals to appropriate external support services.

If you are concerned that your **LLN Tool** skills may not be sufficient to complete the course, you can complete our online interactive LLN on our website. Once completed we will contact you to discuss any required support we can provide.

The LLN tool can be also found at your course booking page.
